

HARUNA HAMIDU KWAIRANGA

Abuja, Nigeria | harunahk5575@gmail.com | +234 706 395 0108

Portfolio: [hhkwairanga.github.io/haruna/](https://github.com/harunahk5575/haruna)

RESEARCH INTERESTS

- Digital Transformation and AI-Enabled Systems
- Intelligent Transportation, Automotive Diagnostics and Data-Driven Mobility
- Data Analytics, Process Automation and Digital Public/Enterprise Systems

EDUCATION

Bachelor of Technology (B.Tech), Automobile Technology Education

2023

Abubakar Tafawa Balewa University (ATBU), Bauchi, Nigeria | First Class Honours, CGPA 4.69/5.00

Final-Year Research: Technical Skills Required of Auto-Mechanic Students for Using OBD-II Scan Tools in North-Eastern Nigeria

Supervisor: Prof. I. Y. Shehu

RESEARCH & ACADEMIC PROJECT EXPERIENCE

Undergraduate Research Project – OBD-II Skills and Automotive Diagnostics

Abubakar Tafawa Balewa University, Bauchi, Nigeria

Advisor/Supervisor: Prof. I. Y. Shehu

- Conducted surveys and interviews with auto-mechanic students and instructors to assess competence with OBD-II diagnostic tools.
- Identified gaps in digital and technical skills required for modern vehicle diagnostics and recommended curriculum updates and hands-on training.
- Applied quantitative and qualitative research methods to connect automotive technology education with emerging digital diagnostic practice.

Engineering Project – Conversion of Petrol Engines to Liquefied Petroleum Gas (LPG)

Automotive Mechatronics Workshop, ATBU, Bauchi

- Analysed engineering design and safety requirements for LPG conversion kits and converted small petrol engines to dual-fuel operation.
- Evaluated fuel efficiency, emissions and operating-cost implications relative to petrol, with emphasis on cleaner and lower-cost mobility.

PROFESSIONAL, RESEARCH & PRODUCT DEVELOPMENT EXPERIENCE

Founder – Sahab Technology Integrated Limited

2025–Present

Technology entrepreneurship, software automation and digital systems

- **Product: NYSC Clearance, a SaaS platform for corps-member onboarding, attendance, leave, queries and monthly performance clearance.**
- Implemented face recognition, geofenced clock-in, QR-verified clearance letters, reporting, subscription/wallet features and organisation-specific deployment.
- Built the platform with Django REST Framework, React/Vite, PostgreSQL, Paystack, Google Maps and Linux/Nginx deployment.

National Youth Service Corps (NYSC) – Information Technology Department, NDIC

2023–2024

Nigeria Deposit Insurance Corporation (NDIC)

- Served in the Information Technology Department, supporting day-to-day IT operations and contributing to digital process improvement during the NYSC service year.
- Developed a face-recognition attendance module using Python and web technologies for real-time biometric attendance logging.
- Designed backend workflows for attendance analysis, leave/query processing and automated clearance-letter generation, improving efficiency, traceability and transparency for corps members and interns.

Data Automation Project – Tax Data Scraper

2023

FIRS TaxPro-Max workflow | Confidential repository

- Built a Python-based scraper for extracting company tax data from the TaxPro-Max portal and distributed workloads across multiple Flask servers.
- Extracted and cleaned datasets with more than 7,000 rows and 50+ fields and generated structured Excel reports for tax analysis and compliance work.

Industrial Training – Industrial Infrastructure Development, NADDC

2021

National Automotive Design and Development Council (NADDC), Abuja | 6-month industrial training

- Worked within the Industrial Infrastructure Development department and gained practical exposure to institutional activities supporting Nigeria's automotive industry.
- Supported routine departmental tasks and developed a broader understanding of automotive-sector infrastructure, industrial development and public-sector operations.

Teaching Practice – GDSS Shongo Idrisa, Gombe

2021

Government Day Secondary School (GDSS) Shongo Idrisa, Gombe | 4-month teaching practice

- Prepared lesson plans, delivered classroom instruction, assessed student learning and applied classroom-management techniques during supervised teaching practice.
- Strengthened communication, mentoring and instructional skills through direct engagement with secondary-school students.

Junior Technician Intern – Exotic Multi Synergy Autos Limited

2020

Automotive workshop internship | COVID-19 period

- Assisted with vehicle inspection, routine servicing, fault diagnosis and workshop repair activities under the supervision of senior technicians.
- Built practical experience in automotive diagnostics, workshop safety and the use of tools and equipment in a professional service environment.

Process Automation Project – VAT Filing Automation System

FIRS TaxPro-Max workflow

- Developed an automated workflow for VAT return submission, including data input, validation and filing steps.
- Reduced repetitive manual processing and helped improve consistency and accuracy of tax-submission workflows.

Open-Source Project – Real-Time WAQI Data Monitor

Environmental data application

- Integrated the World Air Quality Index API to retrieve live air-quality data and built a responsive interface for location-based pollution monitoring.
- Added CSV export for further analysis and used data visualisation to support environmental awareness.

COMMUNITY SERVICE

- Member, Environmental Protection and Sanitation (EPS) CDS Group, NYSC (2023–2024); participated in environmental sanitation and sustainability-focused community service.

HONOURS & AWARDS

- Prof. I. Y. Shehu Prize for Best Graduating Student, Department of Automotive Mechatronics, Faculty of Technology Education, ATBU.
- MSSN Best CGPA Award, Faculty of Technology Education, ATBU.
- Gombe State Government Scholarship Award for academic performance and indigene status.

PROFESSIONAL DEVELOPMENT & SHORT COURSES

• ALX Software Engineering	2022 onward
• Data Analysis with Python	2024
• Net Zero 101: What, Why and How	2024
• Convention on Long-Range Transboundary Air Pollution	2025
• Reporting Climate Data According to Conventions	2025
• Transport and Sustainability, OpenLearn	2025

TECHNICAL SKILLS

Programming & Web: Python, C, SQL, JavaScript, HTML, CSS, Django, React

Data & Research: SPSS, Microsoft Excel, data analysis with Python, survey/interview research

Cloud / Deployment: Linux, Nginx, PostgreSQL, API integration, payment integration

Domain Technologies: OBD-II diagnostics, face recognition, geofencing, process automation, climate-data reporting

Productivity: Microsoft Office Suite, desktop publishing
